

Carnegie of Homestead Patrons,

The Carnegie of Homestead is committed to providing a healthy and safe environment for all patrons and our staff. We continue to follow the information and recommendations that have been communicated by the Commonwealth of Pennsylvania and the Center for Disease Control (CDC) regarding the COVID-19 virus. Given the fluidity of this situation, plans may change and event cancellations may occur. We will continue to keep you updated.

We have taken the following precautionary actions to minimize the potential spread of the virus:

- We have hand sanitizer available for public use.
- We have increased cleaning of high-touch or shared surfaces, including door handles, restroom doors, countertops, floors, handrails, computers and accessories, equipment, and chairs.
- Signs are posted in restrooms and locker rooms regarding the procedures for thorough hand washing.
- Employees and volunteers have been informed that they should stay home if they are sick, seek medical care, and remain at home for the CDC's current recommended time period before returning to work.

We will remain open at this time, with the following changes:

- **The Music Hall** has *not* canceled any performances; however, some performers have postponed their shows. We will update our social media outlets and website as information becomes available.
- **The Athletic Club** will remain open during regularly scheduled hours for gym and weights/fitness machine access. The pool will remain closed for open swim. All group exercise classes, including aqua zumba, will be canceled for 2 weeks starting Monday, March 16. We will tentatively resume classes and open swim on March 30. All existing facility rentals will be honored during this time.
- **Library** afterschool programs will be canceled effective March 16. Afterschool programs will tentatively resume on March 30. All existing facility rentals will be honored during this time.

We ask that all patrons, visitors, and concert-goers continue to follow the CDC's recommendations to help reduce the risk of spreading COVID-19:

- Wash hands frequently with soap and water for at least 20 seconds. Use an alcohol-based hand sanitizer that contains at least 60 percent alcohol if soap and water are not available.
- Avoid touching your eyes, nose, or mouth with unwashed hands.
- Avoid close contact with people who are sick.
- Stay home and away from others if you are sick.
- Clean and disinfect objects and surfaces frequently.
- Cover your mouth and nose when you cough or sneeze.
